

HI-TEC Finishing

August 27, 2019

Re: Water Gremlin Company and Hi-Tec Finishing

To Whom It May Concern:

Hi-Tec Finishing ("Hi-Tec") recently entered into a contract with Water Gremlin Company ("Water Gremlin") in which Hi-Tec agreed to process certain Water Gremlin products using equipment provided to Hi-Tec by Water Gremlin. Hi-Tec became properly permitted for these operations through the State of Wisconsin. When it entered into the contract with Water Gremlin, Hi-Tec was unaware that the chemicals used to process the Water Gremlin products are alleged to be unsafe and unhealthy. Hi-Tec only became aware of this fact on August 26, 2019 after being advised by the local media. In response, Hi-Tec has taken immediate steps to terminate its relationship with Water Gremlin and will not be performing any processing work for Water Gremlin.

Hi-Tec very much values its relationship with the City of Hudson and its residents and apologizes for any concerns this matter has raised.

Sincerely,

Brent LaBrie
